Real Aluminium consists of highly skilled workforce supported by effective management, striving to produce the best for its customers catering to their needs. Our service and products are always personalized according to customer requirement.

For the past 13 years of service and experience has enabled the company to broaden its parameters to all areas concerned in aluminium fabrication. Utilizing the modern machinery and expertise, Real Aluminium has constantly taken extra effort and care to give an immaculate finishing touch to the products of a promising durability ensured by remarkable after service rendered to our customers whenever they expect it.

Consequently we are now capable of undertaking any customer requirement from the simplest to the most complex.

We do strongly believe that the success of business can be gained by dedication.

One of our main objectives is to give the best service to our customers.

Real Aluminium believes that the secret of its rapid growth and success during the past few years is mainly because of the skillful workforce of the company steered by the timely taken precise management decisions. Realizing this primary fact the management intensifies interviews and practical tests for the employees to evaluate their technical expertise, professionalism and previous experience at the enrollment. Real Aluminium also takes pride in creating a friendly and safe working atmosphere for all its employees securing their self confidence and safety at work. This in return yields efficiency and creativity for the betterment of the company’s career. To fulfill the objectives of the company the management needs to rely on employees who are to execute the jobs entrusted to them successfully. As a practical solution to this very need regular training and motivation programmes and incentive schemes are held yearly for employees so as to enhance the know how and skills in their respective fields.
